Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Web Technologies: HTML, CSS, JavaScript (Basic)

Tools: Git, GitHub, Visual Studio Code

PROJECTS

Taskify – Task Management Web Application *React, Vite, Tailwind CSS, JavaScript*

github.com/eNVy-rights/Taskify

- Built a full-featured task management web app with a responsive dark-themed UI.
- Implemented a Kanban board for task workflows and a dashboard with KPI cards and alerts.
- Developed Team and Analytics pages with leaderboards, member metrics, and trend indicators.
- Managed application state using React useState with route-based rendering via MainLayout.

Manyaki – Interactive 3D VRM Character *Collaborative Project*

- Collaborated in a team to develop a talkative 3D VRM character with conversational features.
- Improved user experience through structured testing and iterative feedback.

Smart India Hackathon (SIH) Preparation *Team Project*

- Participated in ideation and solution planning for SIH problem statements.
- Contributed to system architecture discussions and demonstrated agile teamwork.

CERTIFICATIONS

Introduction to NoSQL Databases
